IMPORTANT CONSTRUCTION NOTICE

Date: 9/25/13

Project Number: 109076774

Dear Resident or Property Manager:

Puget Sound Energy's Contractor, InfraSource Services will soon begin replacing the underground gas main in your area. This project is part of our ongoing maintenance program, which assures our customers will continue to have safe, reliable natural gas service into the future.

We are committed to completing the work with as little inconvenience to you as possible; however, there may be some noise and temporary parking and traffic disruptions along the route of the main work. If you find our equipment blocking your way, please tell the crew on site, and they will provide access for you.

The work in front of your property should last only a few days, although the entire project will require approximately 4 weeks to complete. If your business or residence uses natural gas, we will need to enter the premises to upgrade the underground service line and gas meter. If your meter is currently inside, it may need to be moved outside to an appropriate location.

The gas service to the property may be interrupted during the day but it will be restored that same day. We do not know the exact date that we will be performing the construction on your service; however, we will provide notice 24 hours before interruption. If our service person cannot gain access to the property to resume your gas service, a notice will be left at the front door with a telephone number to call for service **1-888-CALL-PSE**.

If maintaining uninterrupted natural gas service is critical to operating your business, please contact Infracource at 206-552-5330 (PM - Patti Ness) at your earliest convenience. We will try to make special arrangements to continue providing the property with natural gas service during the construction.

As we conduct our work, our construction crews will restore the street with temporary paving. When the crews are finished, all streets, sidewalks and curbs will be restored to the same or of better condition. This restoration will be performed by AA Asphalt, Puget Sound Energy's Service Provider for Restoration. This may take up to 60 days.

You may notice some paint markings indicating the location of underground utility lines (yellow = gas, red = electric, orange = telephone or cable TV, blue = water, green = sewer). According to Washington State law, anyone digging deeper than one foot, even on their own property, is required to call the Utilities Under-Ground Location Center at 1-800-424-5555 three working days before beginning the project. Participating utilities send out crews to mark the location of their lines in advance of construction.

Your safety is important to us, so if you ever smell natural gas or notice dirt blowing or bubbling water in puddles, please call PSE immediately at 1-888-CALL-PSE.

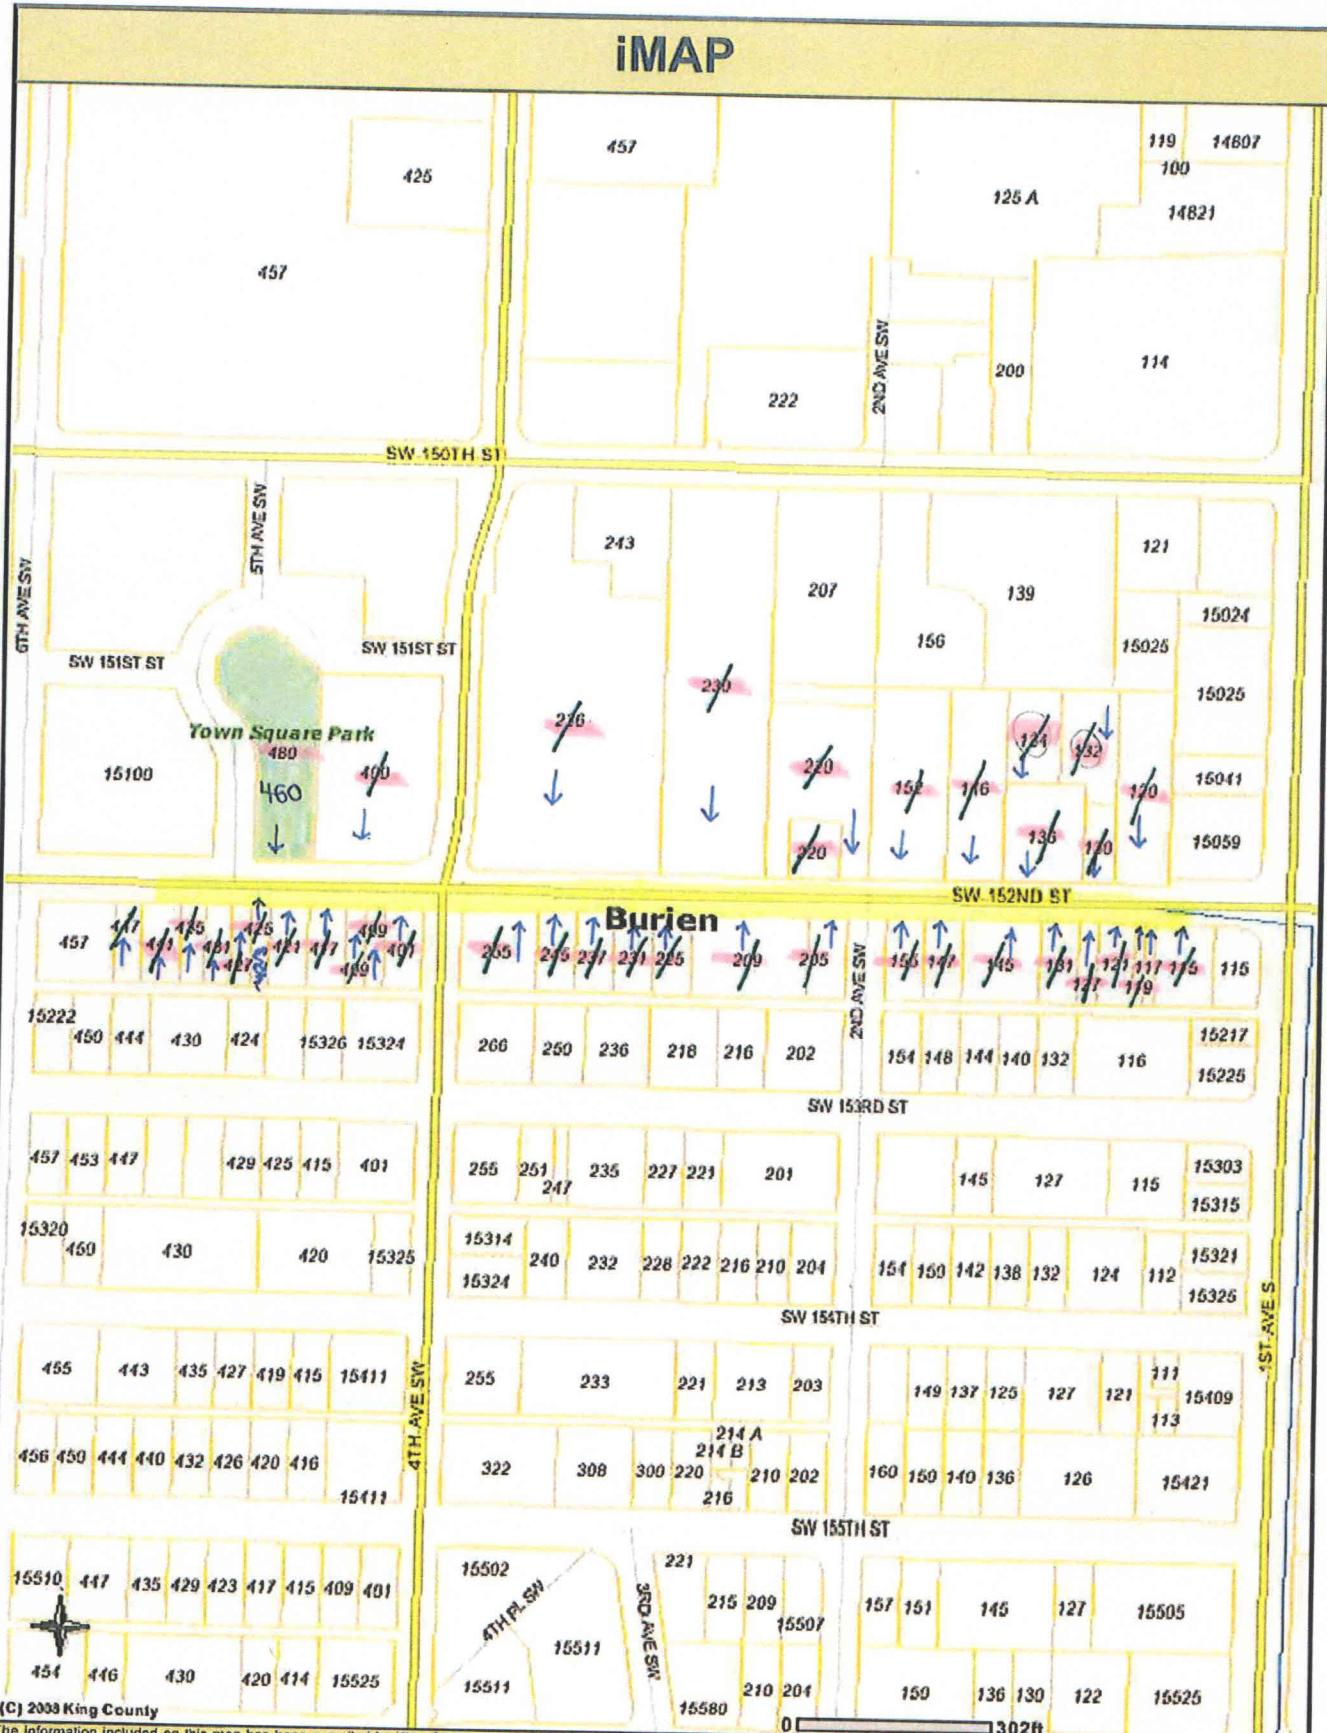

We appreciate your patience and cooperation. If you have any questions, please contact Infracource at 206-552-5330 and reference the project number.

Sincerely, InfraSource Services
